1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claim 8 is rejected under 35 U.S.C. 102(b) as being clearly anticipated by either. Meyers (4,559 959) or Thies et al. (U. S. Pat. No. 5,909,743)

Re claim 8, Meyers and Thies each disclose the housing, filter chamber, and means for relieving pressure (see abstract in each).

3. Claims 9-13 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. In Wilson, Meeker, Cushing et al., Smith et al., Gunewald and Jarvis, note the mesh filter and/or pressure control means.
